Education

Vellore Institute of Technology, Vellore 2023 – 2028 (Expected)
Integrated M.Tech in Computer Science and Engineering **CGPA: 8.36/10**

Technical Skills

Languages: Java, JavaScript, TypeScript, C, C++, Python, SQL, Solidity, 8086 Assembly
Backend & Web: React, Next.js, Node.js, Flask, FastAPI, Vite, Tailwind CSS, Three.js, ERC-1155 Smart Contracts
Databases & Tools: PostgreSQL, Supabase, DBeaver, Docker, Git, Apache, Hardhat, Vercel, AWS, Azure, Figma, Excel
ML & Data: PyTorch, OpenCV, Pandas, LLM Integration, Computer Vision, NLP, Semantic Embeddings

Experience

Software Development Intern | Stayright Consultancy Private Limited (AceHours) Jun 2026 – Sep 2026
- Developed and integrated machine learning components into a live production application, contributing to backend logic and database query optimization.
- Designed and maintained structured database schemas and backend APIs, ensuring data integrity and operational reliability in a professional development environment.
- Engineered a new feature end-to-end for a live production application, from requirement analysis through backend implementation and deployment, collaborating with senior engineers through code reviews, sprint planning and production deployment practices.

Robotics & Electronics Intern | Robomations, Bangalore Apr 2022 – May 2022
- Engineered hardware systems including an Edge Detector, Line Follower robot, and Battle Bot using Arduino Uno, L293D/L298N motor drivers, and NRF24L01 wireless RF modules.
- Designed and rendered a 3D architectural model in SketchUp with a VR-viewable video walkthrough, leveraging tools like Blender, Gravity Sketch, and AutoCAD.
- Applied core electronics fundamentals — 555 IC circuits, logic gates, LDR/ultrasonic sensors, and breadboard prototyping in a hands-on production environment.

Projects

Mentora — Full-Stack Mentorship Platform | *React, Vite, Tailwind CSS, Supabase, Vercel* GitHub
- A full-stack mentorship platform connecting students and mentors with real-time database updates, secure authentication, and a CI/CD-deployed production environment.
- Architected a responsive SPA using React, Vite, and Tailwind CSS with Supabase BaaS handling authentication and real-time database updates, ensuring scalable and secure data management.
- Deployed via Vercel with a full CI/CD pipeline, implementing dynamic routing and state management for seamless multi-role user flows in a live production environment.

SupplyTrace — Decentralized Supply Chain Provenance | *Solidity, React, Hardhat, The Graph, IPFS* GitHub
- A blockchain-based provenance system on Ethereum Sepolia using UUPS-upgradeable smart contracts and a role-gated state machine for tamper-proof product tracking across a 3-tier supply chain.
- Architected a UUPS-upgradeable ERC-1155 smart contract ecosystem with a Manufacturer → Distributor → Retailer state machine, enforcing tamper-proof on-chain provenance with multi-sig governance via Gnosis Safe and OpenZeppelin AccessControl.
- Engineered a high-performance indexing layer using The Graph subgraph for real-time custody transfers, validated through **60+ unit tests** ensuring stable state transitions across all role transitions.

TalentFit — Intelligent Screening Engine | *Python, Flask, Gemini Embeddings, React, Tailwind CSS* GitHub
- An intelligent resume screening engine combining keyword matching and Gemini semantic embeddings to evaluate resume-to-JD alignment with contextual nuance.
- Architected a dual-scoring engine (40% keyword / 60% semantic) with a multi-format parsing pipeline (PDF, DOCX, TXT) auto-identifying **35+ technical skills**.
- Optimized inference to **sub-3-second** processing per document with a React 18 dashboard featuring color-coded skill gap visualizations.

Awards and Certificates

Certifications: Oracle Cloud Infrastructure 2026 Generative AI Professional
